

MICHAEL CARR

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Caretaker for family member

2020 — current

Retail Sales Associate at Kohl's

2018 — 2020

- Strong problem solving and communication skills honed through interactions with diverse customers, conveying product information, and providing effective solutions
- Demonstrated taking initiative and working independently, as well as working collaboratively and contributing to a fast-paced work environment

PROJECTS

StockOptima — A full-stack Inventory management application that allows users to create, edit and delete products displayed in a table with search and filter functionality, a stats page to give you a breakdown of all your products, and a profile page where you can update your name, profile image, and email address.

<https://stockoptima.onrender.com>

Tech stack: React, Tailwind CSS, Node, Express, MongoDB, Mongoose, Recharts

BizTech — A blog website where users can register, write blog posts, like posts, and comment on blog posts. The site allows users to edit and delete comments and delete posts. To enhance the user experience, users can search and select images from the Unsplash API to include at the top of their posts. You can also view posts by author, topic, or user.

<https://biztechblog.netlify.app/>

Tech stack: React, Tailwind CSS, Firebase

Retna — A glasses e-commerce that allows users to filter and sort by a wide array of filters and style options. The application provides a search feature, allowing users to quickly find specific glasses based on their titles. Can add products to the cart, then use checkout with form validation. Gets product data from a serverless function connected to an airtable.

<https://glasses-store.netlify.app/>

Tech stack: React, styled components

OPEN SOURCE EXPERIENCE

- Improved the readability of the energy-prices-api documentation.
